

Based on the pyramid chart below label the correct representative of producer, primary consumer, secondary consumer and tertiary consumer in marine ecosystem

Going up the pyramid chart, the less the amount of energy available at each level of a food chain or food web

Name:

School:

living things can be classified into **two** main groups

Producer
Living things that can make their own food

Algae

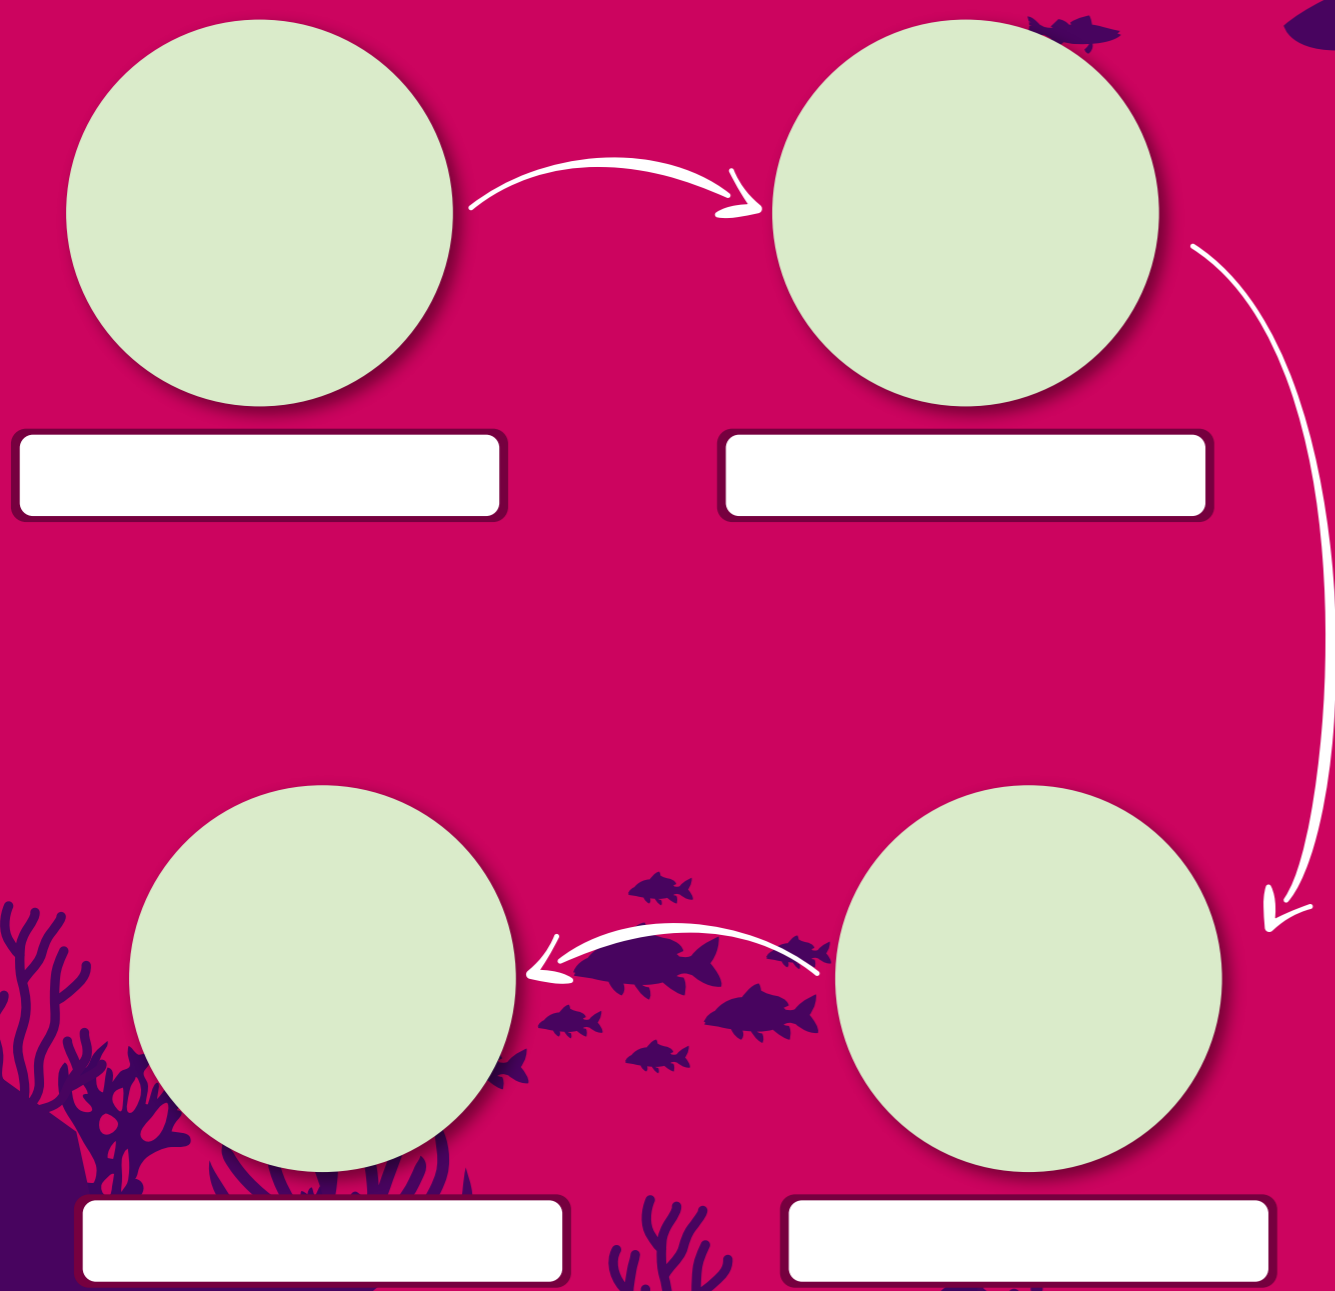

Consumer
Living things that cannot make their own food

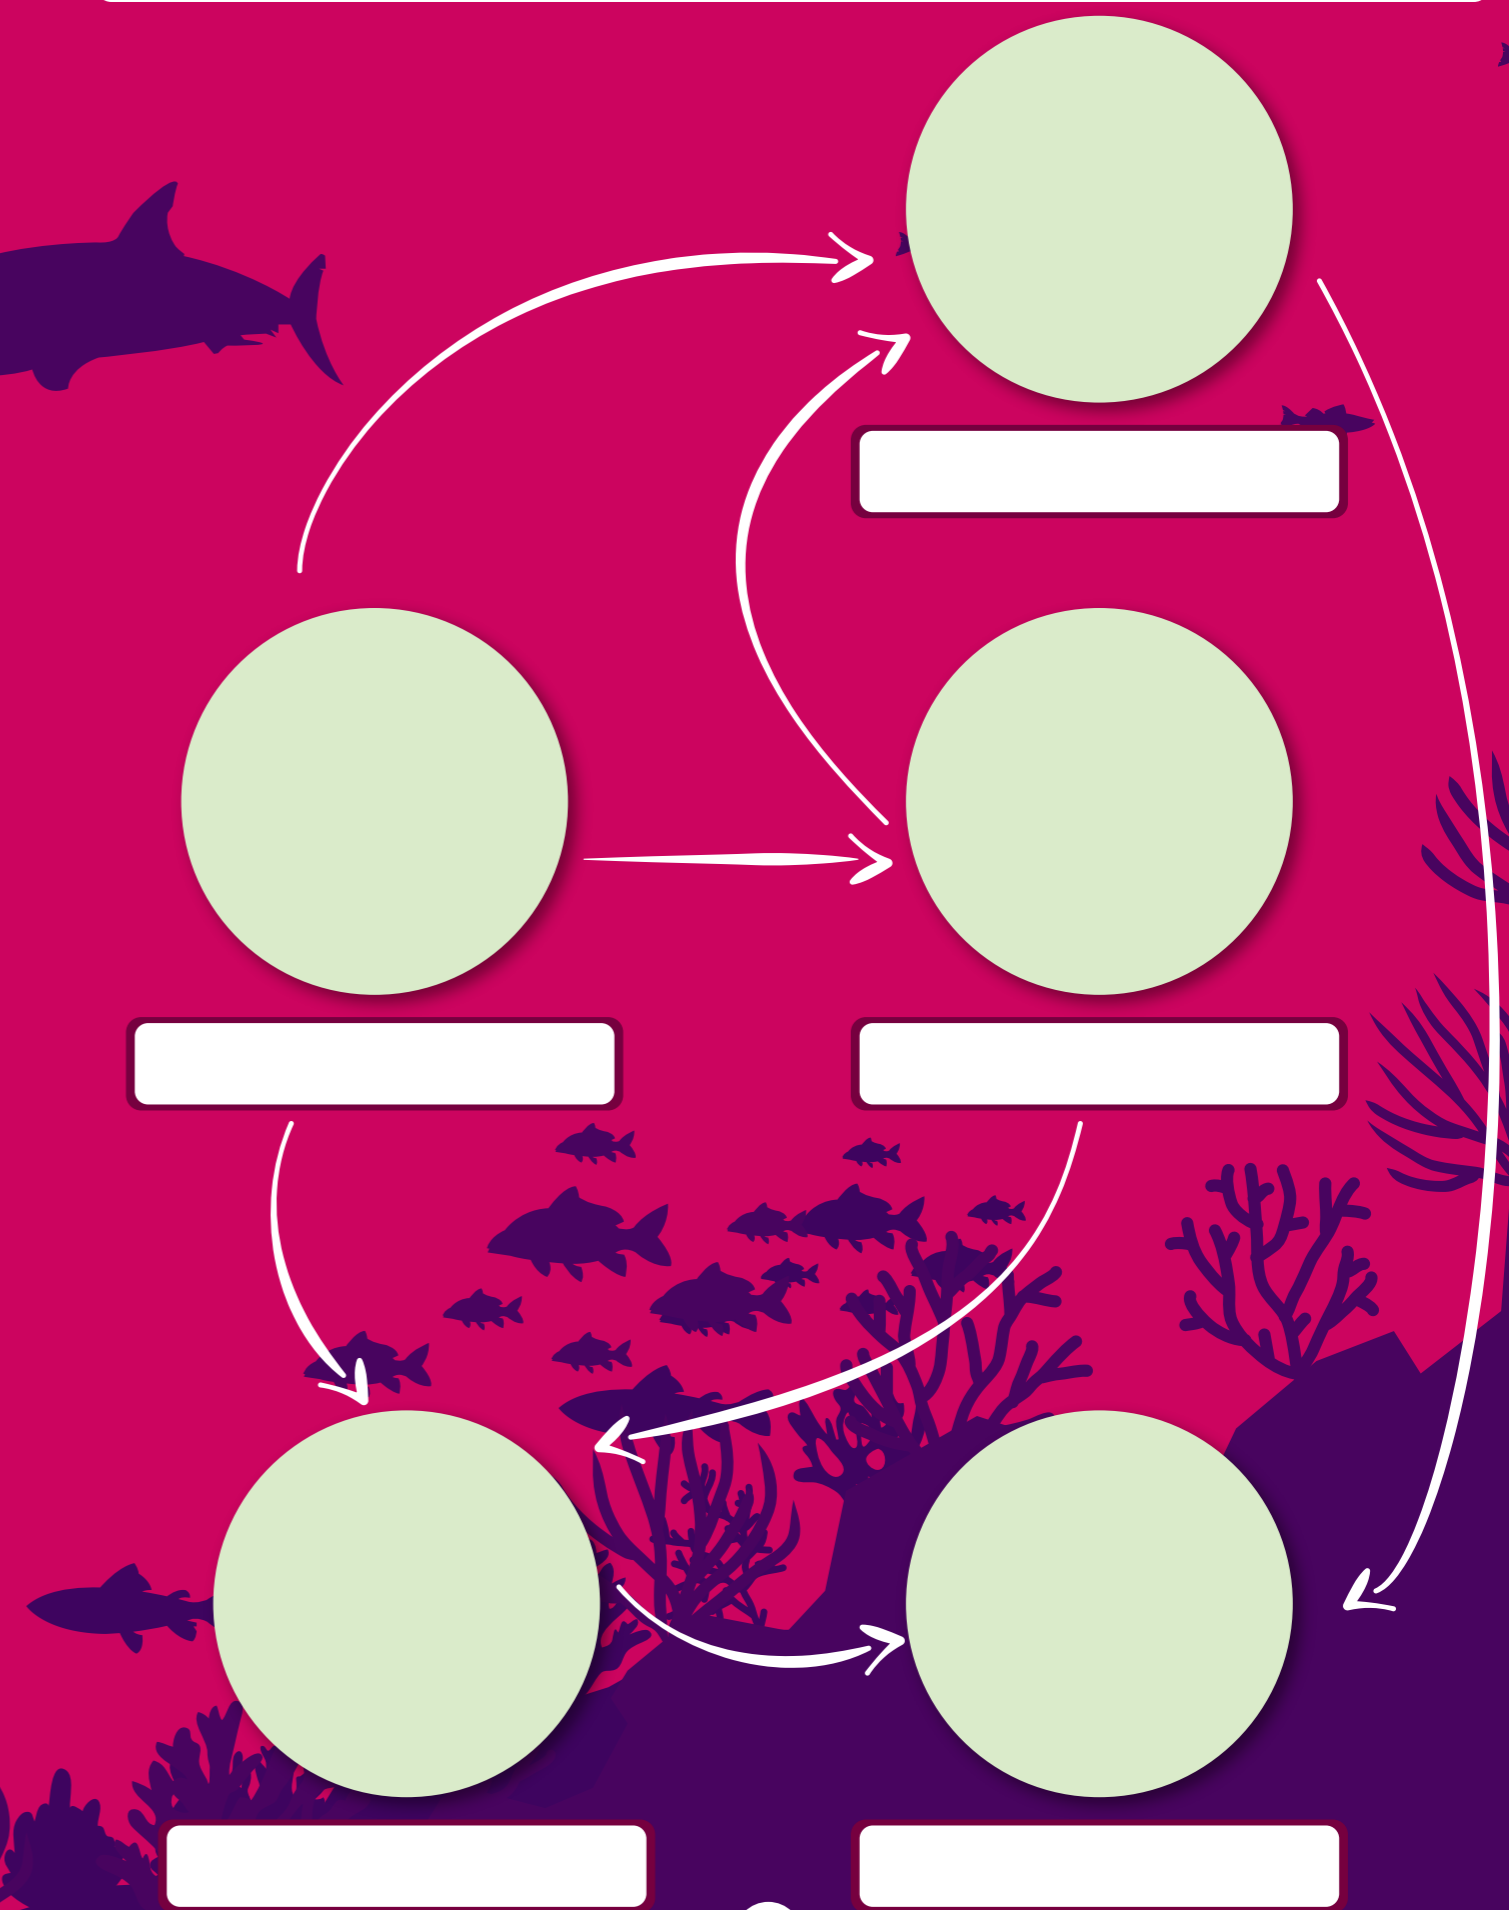

Zooplankton Mad barb Guppy Arapaima

Develop one food chain based on the previous diagram and determine which is producer, primary consumer, secondary consumer and tertiary consumer

2

Develop one basic food web based on the previous diagram
