4

3

I'm floating on the surface of the water with my brothers and sisters. A jelly around us keeps us together

I have a pair of hind legs now! I hope I can leap now instead of only swimming

I'm getting bigger but where is my tail? I have new pair of legs in front now and lungs instead of gills!

I'm not a fish even though I look like one. I also have gills to help me breathe! I can swim, and eat now.
